The Politics of Corruption

Tecnológico de Monterrey

Fall 2026

bgpopescu.net/teaching/corruption

Course Information

Course Title: The Politics of Corruption
Duration: 15 sessions (August 10 – December 4, 2026)
Schedule: Monday lecture, Thursday discussion
Location: TBA

Instructor

Bogdan Popescu
E-Mail: bgpopescu@tec.mx
Office Hours: By appointment

Course Description

Corruption is widely condemned, yet it remains deeply rooted in governments, businesses, and international institutions. This course examines why corruption persists, how it affects societies, and what can be done to reduce it.

The course has three parts. **Part I** introduces the main concepts and methods used to define, measure, and explain corruption. **Part II** examines how corruption developed historically in a small number of countries and how institutions and political choices shaped different outcomes. **Part III** explores corruption in today's globalized world, including its links to foreign aid, natural resources, organized crime, and new technologies.

The course opens with the definitional problem, then teaches students how to read an empirical article critically, because almost everything that follows is an argument built on evidence. No economics, statistics, or programming background is required.

Learning Outcomes

Upon completion of this course, students will be able to:

1. **Read a study critically** — state what an article asks you to believe, find the assumption its authors never wrote down, name what else could have produced the result, and give a calibrated verdict.

2. **Define and distinguish** the main forms of corruption — bribery, fraud, embezzlement, influence trafficking, clientelism, patronage, and state capture — and explain why some corruption is perfectly legal.
3. **Explain why corruption persists**, using both the incentive diagnosis (monopoly, discretion, accountability) and the collective-action logic that explains why everyone can condemn corruption and still take part in it.
4. **Weigh the evidence on what corruption costs**, and say why a cross-country correlation cannot price it.
5. **Compare** how corruption developed and sometimes receded across historical and institutional settings, from the Progressive-Era United States to Hong Kong.
6. **Analyze** the links between corruption and foreign aid, natural resources, organized crime, and new technologies — including where open data and AI tools help and where they fail.

Texts and Resources

No textbook required. See the readings and links under the relevant sessions.

Assessment

The final grade has three components:

- **Contributions to class — 33%**
- **Midterm exam — 33%**
- **Final exam — 33%**

Contributions to Class

The contributions to class are the average of:

- presentation
- physical presence
- class participation
- questions submitted every week
- quality of questions

The mid-term and final exams are closed-book. They will test the improvement of students' knowledge of the theories and facts developed in the course, and independent critical thinking. Both the mid-term and final exams represent 33% of the grade.

A major exam (midterm or final) cannot be made up without the permission of the Dean's Office. The Dean's Office will grant such permission only when the absence was caused by a serious impediment, such as a documented illness, hospitalization or death in the immediate family (in which you must attend the funeral) or other situations of similar gravity. Absences due to other meaningful conflicts, such as job interviews, family celebrations, travel difficulties, student misunderstandings or personal convenience, will not be excused. Students who will be absent from a major exam must notify the Dean's Office prior to that exam. Absences from class due to the observance of a religious holiday will normally be excused. Individual students who will have to miss class to observe a religious holiday should notify the instructor by the end of the Add/Drop period to make prior arrangements for making up any work that will be missed.

Exam dates

The midterm is on **Thursday, September 24** and covers Sessions 1–6. The final exam is on **Thursday, December 3** and covers Sessions 8–14. **Neither exam is cumulative.**

Reading

Each session lists its readings as **Required** or **Recommended**. Required readings are done before the session that assigns them; recommended ones provide additional theoretical, historical, or empirical depth. Both may be assigned for student presentations. Reading completion is tested in the midterm and the final.

Weekly questions

Submit **two questions** on the session's readings before **11pm on Wednesday**, ahead of the Thursday discussion. Each question should be 50–100 words. Begin by referencing a specific part of the text or its overarching claim, then ask a critical question that opens discussion rather than testing recall. Questions are graded on quality, not merely on submission.

Presentations

Each student delivers **one 10-minute presentation** on a reading assigned in advance, drawn from the **Required** or **Recommended** readings of Sessions 3–14. Presentations run on the **Thursday discussion** of each teaching session, from **August 20** onward: two or three students each week, always on that session's own readings. Your reading and date are listed beside that reading on its session page.

Presentations should include a clear introduction, main points, and conclusion. Use visual aids effectively, ensuring text is legible and visuals are relevant. Practice beforehand to stay within the time limit and maintain a confident, professional tone. Be prepared to answer 2–3 questions from peers or the instructor during and after the presentation. Cite your sources, and do not read verbatim from slides or notes.

At ten minutes you cannot summarize everything the reading says, and you are not expected to. Choose the claim that matters and defend a verdict on it.

In addition to summarizing the key arguments or findings, your presentation must include critical analysis of the material. Highlight what the author does not address, the limitations of the research, or potential problems in the analysis or methodology. Think about how the research could be improved, expanded, or connected to broader themes discussed in class.

The fastest route to that analysis is the six moves from Session 2: state the **claim**, reconstruct the **argument** and find the premise nobody wrote down, ask what was **measured** and at what level, ask what the **comparison** was and on what assumption, name the **rival** explanations, and close with a three-tier **verdict** — well supported, plausible but not established, or not established by these data. A presentation that ends on a verdict rather than a summary is doing the work this course asks for.

Rubric for Presentations

Criteria	Weak	Points	Satisfactory	Points	Strong	Points
Critical Analysis and Verdict	Summarizes without analysis. No verdict, or a verdict unsupported by what was presented.	12	Offers some analysis and states a verdict, but the reasoning behind it is thin.	22	Names the unstated premise, weighs rival explanations, and closes on a verdict the evidence presented actually supports.	30
Content Knowledge	Limited or inaccurate grasp of the material.	8	Adequate grasp; identifies the main claim correctly.	15	Accurate and selective — identifies the claim that matters and what the evidence behind it is.	20
Selection and Focus	Attempts to cover everything and finishes none of it, or runs badly over or under time.	6	Covers a reasonable amount within the time, but the choice of what to include seems arbitrary.	11	Chooses one defensible line of argument and develops it fully within the time.	15
Organization	Lacks structure; ideas are disjointed.	6	Somewhat organized, but transitions are weak.	11	Clear introduction, main points, and conclusion, easy to follow throughout.	15
Clarity of Expression	Unclear language or unexplained jargon.	4	Generally clear, though some passages are hard to follow.	7	Communicates precisely and accessibly.	10
Engagement and Response	Reads verbatim; cannot answer questions.	4	Some engagement; answers questions adequately.	7	Speaks to the room, and handles 2–3 questions with substance.	10
Total Points		40		73		100

The presentation is graded on this rubric.

Course Content

Fifteen sessions, each running over two meetings — a Monday lecture and a Thursday discussion built around student presentations. Sessions 1 and 2 are the exception, both taught in the opening week. Session 8 returns to measurement after the midterm; the two exams themselves fall on Thursdays, the midterm on September 24 and the final on December 3. Five weeks of content precede the midterm. Semana Tec (Sep 14–18 and Oct 26–30) interrupts the course twice, and Revolution Day (Mon, Nov 16) is a public holiday.

Session	Date	Topic	Presentations
1	Mon, Aug 10	1 · Welcome, and What Is Corruption?	
2	Thu, Aug 13	2 · Reading a Study Critically	
3	Mon, Aug 17	3 · Incentives, Rents, and the Principal–Agent Problem	
	Thu, Aug 20	*Discussion — Session 3 readings*	Danna · Patricio
4	Mon, Aug 24	4 · Corruption as an Equilibrium: Norms and Collective Action	
	Thu, Aug 27	*Discussion — Session 4 readings*	Nicole · Santiago C. · Chris
5	Mon, Aug 31	5 · The Costs of Corruption	
	Thu, Sep 3	*Discussion — Session 5 readings*	Daniel · Amy
6	Mon, Sep 7	6 · The United States: Patronage, Reform, and the Progressive Era	
	Thu, Sep 10	*Discussion — Session 6 readings*	Barbara · Mía · Diego G.
	Sep 14–18	*Semana Tec — no class*	
7	Mon, Sep 21	7 · Midterm Review	
	Thu, Sep 24	**Midterm Exam** (Sessions 1–6)	
8	Mon, Sep 28	8 · How Corruption Is Measured	
	Thu, Oct 1	*Discussion — where the arguments go next*	
9	Mon, Oct 5	9 · Clientelism and Vote Buying	
	Thu, Oct 8	*Discussion — Session 9 readings*	Gerardo · Mariana · Santiago G.
10	Mon, Oct 12	10 · China and Hong Kong: Corruption, Growth, and Clean Government	
	Thu, Oct 15	*Discussion — Session 10 readings*	Armando · Iván · Alejandra
11	Mon, Oct 19	11 · Kleptocracy: Where the Money Goes	
	Thu, Oct 22	*Discussion — Session 11 readings*	José · Daniela · Nicolás
	Oct 26–30	*Semana Tec — no class*	
12	Mon, Nov 2	12 · Organized Crime, Violence, and State Capture	
	Thu, Nov 5	*Discussion — Session 12 readings*	Leonardo · Luis · María
13	Mon, Nov 9	13 · Technology Against Corruption: Open Data and AI	

Session	Date	Topic	Presentations
	Thu, Nov 12	*Discussion — Session 13 readings*	Juan · Carlos · Diego R.
	Mon, Nov 16	*Revolution Day — no class*	
	Thu, Nov 19	*Catch-up session — readings not yet presented*	
14	Mon, Nov 23	14 · Final Review: How Countries Escape, and Synthesis	
	Thu, Nov 26	*Discussion — Session 14 readings*	Alejandro · Sofía · Kiara · Ximena
15	Mon, Nov 30	15 · Final Exam Review	
	Thu, Dec 3	**Final Exam** (Sessions 8–14)	

Attendance

Students are required to attend classes following the university's policies. Students with more than three unexcused absences are assumed to have withdrawn from the course. Students with a justified reason for missing class must send an email to the corresponding instructor before the session.

Academic Integrity

The use of artificial intelligence is permitted within the university's ethical guidelines and applicable law, under one condition: every submission includes an appendix stating which AI tools were used, for what purpose (brainstorming, grammar, translation, finding sources, data analysis), and with which prompts. Disclosed use within these bounds is legitimate — learning to use AI responsibly is one of the competencies of this course. Undisclosed AI use is academic dishonesty. The analysis itself — the choice of case, the diagnosis, the argument — must be your own. It is the responsibility of students and instructors, from their respective roles, to know and apply the institutional guidelines.

Any act of academic dishonesty will result in a failing grade on the work in question. Cases of academic dishonesty will be reported to the academic administration.

Students with Special Needs

The university does not discriminate based on disability. Students with approved accommodations must inform their instructors at the beginning of the term. Please see the institutional website for the complete policy.
